"SYSTEM FAILURE" Script

INT. CONTROL ROOM – NIGHT

Raymond stares flabergasted at the computer screen as rows of
warning lights flare up.

>   RAYMOND
>   Hang on, what the hell is going on
>   here?

>   HOWARD
>   What?

>   RAYMOND
>   The security perimeter is going
>   down across the board.

>   HOWARD
>   (to John, annoyed)
>   Go find Nigel.

>   RAYMOND
>   OK, the power is going down.

John stops short of the door as the whole control room
suddenly shuts off. They all freeze in their tracks,
realizing the seriousness.

>   HOWARD
>   (to Raymond)
>   Well, get it back up! Use Nigel's
>   terminal.

Raymond quickly rolls his chair to Nigel's screen.

>   RAYMOND
>   Why's this one still on?

John steps forward, alarmed.

>   JOHN
>   Tell me the containment field isn't
>   down.

>   RAYMOND
>   (checks)
>   No, it's still on.

>   HOWARD
>   Why the hell would he turn the
>   perimeter off?!
